

Cooling / Heating coils

Water coils Steam coils Direct expansion coils

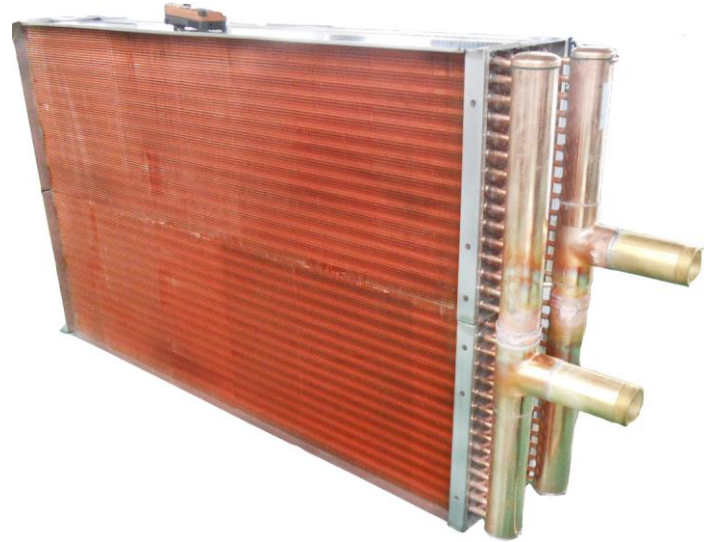

- Manufactured to any size and capacity
- Copper tubes with aluminum or copper fins
- Galvanized or stainless steel casings
- Replacement coils horizontally split for easy installation

Cooling / Heating coils

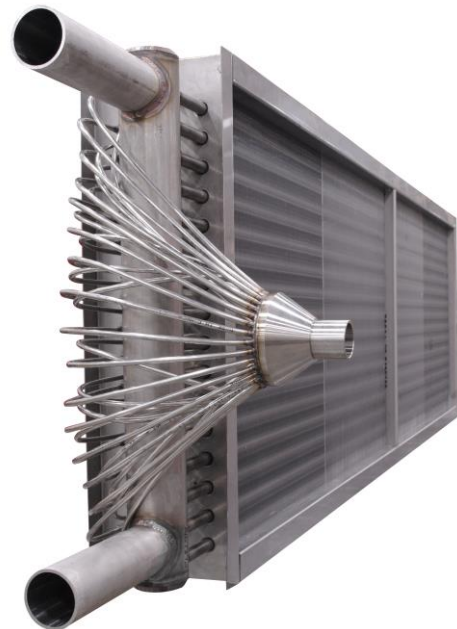

Chilled Water Cooling Coils

Chilled Water Air Cooling Coils for Air Conditioning and Process Cooling which can be used with ethylene or propylene glycol solutions for low temperature applications.

DX Cooling Coils

Direct Expansion Air Cooling Coils for Air Conditioning and Process Cooling which can be used with HFC and HCFC refrigerants.

Cooling / Heating coils

Steam Heating Coils

Steam Air Heating Coils for Air Conditioning and Process Heating using Dry Saturated Steam. Coils can be manufactured to suit almost any size of Ducting, Plenum or Air Handling Unit.

Hot Water Heating Coils

Hot Water Air Heating Coils for Air Conditioning and Process Heating using L.P.H.W., M.P.H.W., H.P.H.W. or Low Grade Hot Water generated from other equipment.

Example

Chilled water cooling coil

Dimensions 1500x1500 mm

Cu tubes / Cu fins

10 tube rows

SS casing

Split in 4 horizontal pieces

USD 12.500
