

## Prefabricated piping

Production of full prefabricated pipe packages for BWMS installation, scrubber installation or other major pipe retrofits.

- Prefabrication of all steel pipes from DN32 to DN 1500
- Hot dip galvanised according to ASTM A123/A123M, ASTM A143/A142M & ASTM A384/A384M
- Based on accurate isometrics, provided by client, or designed by us based on 3D laser scanning (option)
- 10 Days of installation supervision by one of our Naval Architects is included (on orders above 6 tons of piping, excluding travel, boarding, and lodging)
- Delivery to major port Europe is included (CIF)\* (on orders above 6 tons of piping)

**8.5 EUR per kg**

\*Based on freight rates Oct. 1<sup>st</sup> 2021, price is subject to change if rates varies more than ±10%

Easy fit, fast installation!

Each spool designation is welded on to the pipe, before galvanising for easy identification on site and easy future replacement, as they can be ordered as spare parts.
